

OUR ROLLING STOCK.

conjean get along without collar and cuffs, but you can't and very well. They are exceedingly useful and when some to be all right they are exceedingly ornamental vare not faultless you might almost as well be without. Nothing gives its self away, so to speak, as quickly as aged collar or a frayed cuff. People will notice them they don't notice any thing else about you. Why not good shirts, good collars, good ties, good underwear, gloves and hosiery, when we can show you the very best in French, German, and American goods at the same you have to pay for inferior articles anywhere but in clasive gentlemen's furnishing and clothing house, is some satisfaction in wearing our new office shirt; it's to wear, and fit and not cut your throat with your and costs only \$1.25. All the leading makes of W. G. Skeltons, Took's & Messer, shirts, collars, cuffs and shirts.

BRANDON'S NEW HOSPITAL.

t HastOnly Been Open Abo Weeks and Has Already Nine Patients.

A fine building standing on the top of a gentle rise a little to the southeast of first street, in the city of Brandon, such is the new Brandon Hospital, an institution which has recently been creeted and opened, by the large hearted efforts of the good Samaritans, of this and the sur-

memb Mr. H. C. Grahan may secure his to the startess and descend to the base, ment.

Here we first inspect the engine room from which the building is heated through the wind the building is heated through the promise of the contended of the contended in the building is heated through the startest during room dispersary. The createst's homemask cooks and store rooms are also here and are most store rooms are also here and are most store rooms are also here and are most store rooms are also here, and are most store rooms are also here, and are the foot of the elevator fewing to the top will be compared to the contended of the corridor, the operating room, suitable in the contended of the corridor, and find on either side of the corridor, and the corridor of th

Persons occupying private wards, will Rides.....

pay \$2.00 per day and medical attendance and in the general ward those who can pay will be charged \$1.00 per day, but those who really cannot pay will be treat-ed free; "In as much as ye have done it unto one of the least of these my breth-ren, ye have done it unto me." Mr. John Dickson, Dentiat, Fleaning Block, will be happy to receive all dona-tions.

Hayfield.

All things are flourishing in this dis brict. There is a very large acreage being put in and the majority of farmers are about through with their wheat seeding. The erection of the new Presbyterian church is being pushed on. It will be a handsome brick building when completed.

We are very glad to see Mrs. Hearn around again after having been ill for some time. The footbell club is reorgan around again after having been ill for some time. The footbell club is reorgan issed with a large membership. Our silent member Mr. H. C. Grahach may secure his seat again at the coming election. The government have kindly cut out all the good conservative districts in South Brandon for him and doubtless he will be as liberally supplied with cash and whiskey as his friend Mr. Sifton was in the last North Brandon election. It is supposed that Mr. Graham is training Mr. Haddo to take the same position that Mr. Pilling filled so satisfactorily in North Brandon.

AMERICAN WHITE PINE LUMBER, KILN DRIED.

The F. T. Cope Manufacturing Co, have now on hand a full stock of lumber which we are prepared to sell at prices which defy competition. We belong to no retail association, being wholesade chelers, consequently we can sell lumber at first cost. If you are going to build, call and see us, as we can save you money. We have now our new planing mill in full running order, equiped with the best and latest machinery made. Our Wr. Cope made an extensive trip through the United States and Canuda, purchasing the best machinery in the province. All our doors, sash and finishings will be run through the three drum Beloit sander, acknowledged by all machine men to be the finest sander made. We shall carry a full line of moditings, such and doors. All our work will be turned out kiln dried, as we have in operation the Buffalo hot blast dry kiln, admitted by all to be the oals system to thoroughly do hot blast dry kiln, admitted by all to be the oals system to thoroughly dumber. We shall also manufacture our own bricks, having placed in our yards the latest brick making machines, also a repress machine for repressing our face brick. Call and see our stock and we shall be pleased to show you through our factory. Trusting for a share of your patronage, We Remain.

We Remain.

D. Husband's resignation was accepted and Dr. J. J. Anderson was appointed.

ed.

There was a motion passed the council to expend some money for road improvements in each ward under the supervision of a committee composed of the reeve and countillors for each ward.

A motion was passed to authorize the clerk to procure \$50 worth of gother poison to be distributed without charge to any ratepayer.

poison to be unstructed to ask the as to any ratepayer.

The clerk was instructed to ask the as sessor to attend the court of revision which will be held on the 3rd of June next at Nesbut.

The council adjourned to meet as

next at Nesbit.

The council adjourned to meet as a court of revision at that place on the day aforesaid at 19 o'clock.

WAWANESA.

Like telling of a fine day we commence to spock of Wawanesa. We are not posted with the geography of the district in which this beautiful little town is situated. There is every evidence, however, that the quality of the land is good, for the people both in town and district are satisfied and making money. There is other evidence of prosperity.

The class of men doing business in Wawanesa are uniformly solitent and ambitious and not of that reaching disposition, better understood in other localities where surroundings are of a cheaper quality.

where surroundings are of a cheaper quality.

The officials of the district are very much respected by the ratepayers, notice able, the reeve, and in resurn they book carefully and impartially to their welfare. A synderate is being formed to erect a roller grist mill in town with possibly suitable power stached for the purpose of establishing a woolen factory, such as is being carried on at Rapid City. The promoters of the enterprise include some business men in Wawness and adjoining municipalities. Reeve Fowler is doing minicipalities. Reeve Fowler is doing his lovel beat to neet the probable requirements of the majority of the people in the establishing of these very important enterprises.

These is no reason. Wawness should.

ments of the unpury version of these very insportant enterpuises.

There is no reason Wawanesa should
not be made a manufacturing centre, and
it said water power can be had at a very
small outlay. Of course, owing to the
natural position of the town for manufacturing purposes, the natural jealousy
renisting in country pleans, particularly
among some classes of the community
will be unfelt and unseen here. We intend to get better acqualated with the
natural recourses of this district es as to
give outsiders some further intimation endy
to place the views of our correspondents
before the public on the subject.

Big Western Farms.

A Talk With The Leviathan Till-er of Brandon.

To a representative of the Free Press Mr. Sandison said:

I am pu ting in crop 3,300 acres this year, of which 2,800 acres will be in wheat. 1,800 acres are up to date seed. As soon as we get through there I am going with my full gang, thrity men and thir y teams, to Carevale, which is some seventy miles southwest of Braudon on the way to the coslidelds, where it is my intention to break up three sections of land to be ready for cropping in '93. At the prosent time accommodation and stabling are being run up for the outfit. I have the greatest faith in the future development of that part of the country. I had a homestead their some eight years 420.

I had a homestrad there some eight years ago.

Asked as to immigration, Mr. Sandison replied: "I believe we are just on the tide of a very large immigration; every thing to my mind points in that direction. People in the old countries are beginning to believe in the northwest again. Today, at home, Australia is out of favor, which fact, of course, will benefit our imigration prospects. Some men came out with me this spring who had previously been in Australia, and returned disappointed to England. If only the Dominion government did as much as the C. P. R. for immigration, this country would soon be peopled. Lest year the harvest excursions from Ontario did a power of good; numbers of young Ontario farmers have returned this spring, after viewing the land of promise last fall, brought a team with them, and mean staping. On my return to Brandon this spring, I found over 200 letters waiting for me from young men, wanting to know where they could place them elves to best advantage or in search of employment."

"In reference to your new scheme,"

queried the reporter, "do you think it will be feasible to run two of such mammoth farms at a distance of seventy miles?"

"Yee, I do," replied Mr. Sandison, "for this reason, that I have able practical men, who have been with me for several years, with whom I am able to place the most implicit confidence."

"HE BLARSET PARKE.

Professor Tanner returned from the Qu'Appelle district yesterlay, after a three weeks inspection of the properties of the Canadian Atlantic company. The former company intend to crop same 1,500 acree the spring, 300 of which are already seeded, and they are now esseling at the rate of 100 acree a day. Professor Tanner reports as follows: The sondsiden of the property of the C. U. C., under the precidency of Lord Brassey has been thoroughly investigated by myself and Mr. Mc. (Connell, who came over from the old country to make a searching examination of the condition and prospects of the could be selected to the selected of prospectity. As to the properts of prospectity. As to the properts of prospecity. As to the properts of prospecity. As to the properts of the Canadian Alliance farm, I am glad to say, we find a very bandsome dividend will have to be declared at the meeting of the directors in London. We have fully realized the extent of last year's bountiful harvest, and its result just fy the considerable extensions we are making and intend to make."

Professor Tanner goes east on Friday,

ALASKA.

and vancouver, as he inless, fords, etc., of British Columbia, to Siths and the great Mur Glacier. Among other places the steamer will call at Fort Simpoun, Mashkahlah, Gerdam's Intest, Chinn Mar, Fort Repert and Alert Bay: points not visited by the other steamer that have hitneric made the trip to Alaska. In this way some of the saces amonficent "I the coast seemery of British Columbia will be seen, and seen from the deed of a new, well appointed and comfortable steamer. The passage being in smooth hard before the contract the coast household: a great part, indeed,

umbia. This picture sque and interesting portion of the North American continent is very little known; an excellent essert pittle known; an excellent essert pittle known; an excellent essert pittle known; an excellent essert when he visited it as Governor-General of Canada; and the fact that the trip can now be made with every comfort and at such a r-asonable cost (485 the return ticket from Victoria or Vancouver) ought to attract a number of those who desire to recruit their health and at the same time only a novely E; travel. Tickets and berths, etc., for this Tour can obtained from x, y agent of the Canadian Pacific Rail-ray.

The Northern Pacific Railroad Co. are having trouble keeping their track in order. In some places built on greavy clay side hills, mores down of its own weight. The company are doing every thing possible to keep trains running on time and prevent accident.

A CHANGE IN THE CABINET.

A CHANGE IN THE CAPINET.

From reports it is apparent changes are shortly to be made with the Federal Cabinet. Mr. Dewdney, than whom there is no better man in the Cabinet, is likely to retire and take the Lieut. Governo-hip of his own province, British Edille, the result of the government should put candidates into the field in every constituency at once and get ready the Voters' Lists foolumbia, and his port folio is to be filled by a Northwest man. No doubt Mr. Davn is sapiring for it, but if he lives till he gets a seat in the Federal Cabinet, he will not die till he is not only very hald but sho very grey. The choice then lies between Mr. A. W. Hoss and Mr. T. M. Daly. What the Premier and his controlled the services of the Conservatives of the Northwest as a whole, they will give the desires of the Conservatives of the Northwest as a whole, they will give the Postition to Mr. Daly. Mr. Daly is not only as stell posted on the wants of this country and as expatbe a man in exemptive respects as the rival, but the has other claims Mr. Ross at present has not. No doubt many in and as-sonal Winninges, which fact, who there conditions being equal, ought to have some affect. No doubt since Mr. Ross conversion some four or five years, which he is located, is eligible to vote, and no mental as a single head before a committee the whole country. Mr. Daly has been a life, long supporter of the parify, which fact, who there conditions being equal, ought to have some affect. No doubt since Mr. Ross conversion some four or five years, which are consistent man, but there ought to be something in making a man earn his spurs before he receives them.

A FACILLATING PARTY.

The enthusiasm with which the Liber the enthusiasm with which the Liber view of the provision of the governam and that the blank so filled is sent to the field in every country, and that every available opponent of the governam and that the blank so filled is sent to the field in every country, and that every available opponent of the governam and that th

The enthusiasm with which the Liberals in Parliament have taken up the cry of Canadian Independence fairly illustrates their fickleness in respect of a policy. There is not a man who has follow the drift of political affairs for fifteen years but must have noticed this importance difference between parties—That while the Conservatives have steafastly adhered to the policy which they adopted in 1877, the Liberals have within the same period made at least six radical changes. These changes might be set out in chromological order as follows:—

1878—A Revenue Tariif.

1886—Maintenance of the N. P.
1885.—Commercial Union.
1891—Curstincted Reciprocity.
1892—Canadian Independence.
Even this list hardly does the Liberals full justice; for it will be remembered that in various parts or the country even the same policy was given important variations. For example, every one in the west knows that unrestricted reciprocity was understood to mean annexation in Essex during the general elections campaign last year.

There is one thing, however, in which The enthusiasm with which the Liber-

Baset during the general cereations can-paign last year.

There is one thing, however, in which the leaders have been beautifully consist-ent, and that is a pronounced anti-British sentiment. In all their vacilisations, in all their ups and down s, they have main-tained an unchanging hostility to every-ining British and have been persistently costatic in their admiration of everything American. Whether in the advocacy of a revenue tariff or unrestricted reciproc-ticy, they have had their eyes steadily fir-on Washington; and, paradoxical as it may seem, even in the advocacy of Can-dian Independence, their hopes have ian Independence, their hopes have sted on the Stars and Stripes. From is they will probably not change until the are none of them left in Parliament

The editor of the Brandon Matt, in making note of the Spurse Pianetesler, takes occasion to prouch a lattle housing on the folly of young men starting into the journalistic protession, in the small forms of this protession, in the small forms of this protession, in the small form of this protession, and quereducially remarks that it makes he understanding why this is thus It would probably be assist to explain sufficient reason why one professional who shall be mancles of comprehensions which is the start of the product of th

There is a sast difference between a man starting a branch business out of his own resources, expecting nothing out of at present but trusting to the future for returns, and one starting a principal for estimate, and one starting a principal for estimate, and one starting a principal constituency at central meetings while returns a more principal constituency at central meetings while constituency at the party the wisest course will be taken as to the constituency of Hartney.—En]

Wall Paper.

The stock of the city is now open at Cliffe's bookstore, 5th street and Resset Advence. All other dealers are discarded in price, taking quality into account. NOW FOR ACTION.

As will be seen by another column in this issue the Greenway Government is springing the elections, or at least the compilation of the Voters' Lists on the people, which means the same attri

tist. We again repeat let our trients see to it at once that good candidates are placed in the field in every county, and that every available opponent of the government is properly on the list. Success in these particulars means success at the polls, and neglect of it means defeat. This is the whole case in a match box. Will our friends do their duty?

COMMUNICATIONS

COMMUNICATIONS.

Belview, April 22,1891.

Data Sins- Echeving you to be a well informed politician! I would like to know what is the proper mode of selecting a candidate. I am informed that a Conservative meeting was called at Hartmey on the 18th into the purpose of organization of the purpose of the purpos

of the people, and not by a packed convention such as is too often the case?

[To our correspondent we have to say that when the bills cailing the meeting did not say delegates were to be selected, they should not have been chosen. Besides this it is unfair and improper for any central gathering, no matter how called to mane delegates for the selection of a candidate. The local associations is every case know better whom they want for delegates, and who will express their wishes at a convention than any other whose at a convention than any other whose of people, and the choosing should be left to them. When the delegates are chosen by the local or township associations they receive their instructions from them, and a convention made up of delegates so chosen, must represent the wishes of the Constituency as a whole and not a particular section of it. As a convention made up of delegates from lossociations represents the fullest roice of a constituency, the choice of such central insistent to be the favorite of the constituency, and in every case stands the best chair co of election. Besides when the such as the convention is sure to be the favorite of the constituency, and in every case stands the best chair co of election. Besides when the surface of the constituency, and in every case stands the best chair co of election. Besides when the surface are such control of the constituency are control of the party the wiscest course will be taken as to the constituency of Hartney.—En]

ICE LOCOMOTIVE.

Description of a Machine Invented by a New York Belier Inspector.

At Fishkell Landing on a freight ear is a so-called ice lecomative. It was built by a New York buser inspector as an experiment for navigating the Hudson on the ice. It is about six feet long, with a cab attached. The builer head, inside the cab, is supplied with a trottle valve, steam gaure, reverse lever and steam cocks exactly like a locomotive. Under the center of the boiler, connected with the steam chest yield rook, are two small cogwheels, twelve or fifteen inches in diameter. Under each end of the machine are two steel runners cach a foot long and fashond like derient runners. The cogsioned like circuit runners.

into the possession of the well-known Birmingham physician. Sir James Sawyer, says London Til-Bits. It is one of the hoots of the identical horse that Lord Cardigan rode in the charge of the light brigade. Lady Sawyer's father, who was a Lincolnshire rector, received this precious relic of the historic charge from Lord Cardigan, and it bears an inscription to this effect. The four hoofs are now disposed of as follows: The prince of Wales, an honorary colonel of the Tenth hussars, has one another belongs to the officers of that famous regiment, and it is brought out at mess on state occasions; the countess of Cardigan owns a third, third, and the last, which is the off hind hoof, graces the sideboard of Nar James Sawyer. It is beautifully mounted in hird, and the last, which is the oil hind oof, graces the sideboard of Sir James awyer. It is beautifully mounted in liver and is naturally highly prized by

Deaths Among Pensioners.

The grip is reaping many vietin among the pensioners, and a large nu ber of pension office certificates lie Pension Agent Clements' dosk unsign having been returned because of t sudden death of the veterans who names are contained therein. Sin quarterly payment day, January 6, me then forty deaths among the pension have been remoted, to Cal. Clement then forty deaths among the pensic have been reported to Col. Clem and in almost every case death was den, and from the grip. "I do no member having heard of so many de among the pensioners in so she time," said Col. Clements.

A wandering Hottle.

A bottle filled with whisky by a New York liquor dealer, and carried to sea by a New Yorker bound for Europe, lately reached the liquor dealer again, after many months and through a strange channel. A friend of the traceler affirms that the bottle, emptied of its contents, was thrown overloard while the ship was still far from shore, but the liquor dealer is equally positive that the bottle came back to him in a case of rum imported from the West Indies.

And will not be undersold. This is why they do a rushing business. If you want tea, call and try our superior 40c at 3 pounds for one dollar. It beats them all for fine flavor. We will give special bargains to those buying from 25 to 50 pound lots, as we have in the past in order to reduce our large stock. We still sell 2 cans of tomatoes, corn, peas, beans, pumpkins or salmon for 25 cents, and canned fruit as low as 20 cents per can. A very superior soda biscut, 3 lbs for 25c. All kinds of California evaporated fruits on hand, cheap. A fine line of new misms, currants, figs and prunes away down. Also a lot of beautiful dates at 12½ c, and for soaps, they are cheaper than ever. We keep a full line of flour, all grades, very cheap for cash. All kinds of meal, potatoes, butter and eggs kept on hand. We pay the highest market prices for farmers produce and will not be undersold. We thank you for your large patronage during the winter, and still expect greater things for the future. Come on; we will try and serve you promptly as we have more help now. Don't forget the place.—Symington's old stand, 10th St.
